SUMMARY

Technion BSc Computer Science graduate with Dean's Honors seeking full time Full Stack Engineering roles. Hands-on experience in React.js, Node.js, JavaScript & C++; developing web & mobile applications.

FULL STACK DEVELOPMENT PROJECTS

Full Stack Web App Developer, Reacts.js & Node.js (2024–Present) ([GitHub](#))

- Used React.js (MaterialUI, TypeScript) & Node.js (Express.js, Nest.js) to develop a job-search app
- Node.js backend built to support job filtering, Google login & expandable cards with personal details
- Integrated SQL (Postgres) & NoSQL (Firebase) databases for wide use cases & role-based access control
- Utilized Google Cloud, JWT tokens & OAuth2.0 protocols for secure authentication
- Enhancing database efficiency through query pagination & Redis caching

Full Stack Android Developer, Flutter & Dart — Social Media App, Technion (2023) ([GitHub](#))

- Built the app with Flutter, using Dart for UI structure, state management & backend functionality
- Designed a user-friendly UI with Flutter for profile updates, post notifications & friend management
- Used Dart to create backend features like HTTP requests, JSON handling & external library integration
- Leveraged Firebase Firestore for NoSQL data management and Firebase Auth for secure authentication

Unity Game Developer, C# & Unity Engine (2023)

- Developed a 2D rocket navigation game using C# & Unity Engine with physics-based mechanics
 - Designed escalating levels with dynamic and static obstacles to boost player engagement
 - Integrated realistic physics attributes like thrust, gravity, and collision detection for smooth gameplay
 - Utilized scripting in C# to manage game logic and improve player interaction
-

EDUCATION & SKILLS

BSc in Computer Science, Technion Institute of Technology (2019–2024)

- GPA: 82.2
- Dean's Honors (2019)

* Relevant Courses: Data Structures, Algorithms, Operating Systems, Systems Programming, Software Verification, Network Security, Database Systems, Intro to AI, Computer Architecture

Full Stack Web Development Bootcamp, Udemy (2024) ([Certificate](#))

- Implemented HTML, CSS, JavaScript, Node.js, React, & PostgreSQL
- Introduced to Web3 technologies and decentralized applications (dApps)
- Gained hands-on experience in frontend design and backend server development
- Developed skills in database management, API creation, and secure authentication implementation

Hard skills: React.js, Node.js, JavaScript, TypeScript, C++, Python, Express.js, Nest.js, SQL (Postgres), NoSQL (Firebase), Git, GitHub, Postman, Dart, Flutter, Linux Command Line, Cryptography

Languages: Arabic (native), Hebrew (fluent), English (fluent)
